- Adam was a good TA

Adam was a really good TA. Even in 33A, I ditched my TA to go to his sections, and I was so happy that he was the TA for 115A. He was effective at teaching linear algebra because he was able to explain it in a simple way that it was understandable for his students. I also attended his office hours and they were helpful as well although I don’t know how to compare him to other TA’s. Adam graded the 2nd midterm and although I scored a bit below average, I acknowledge he graded fairly and really took time to understand the thought processes behind every student’s work. He also compiles a study guide for the midterms, which I thought was quite helpful in preparing for them.

- Adam was an effective TA and was constantly available to answer questions outside of the classroom. This was very useful since math 115A is very difficult to comprehend and our class had weekly homework.

- Nice TA! Had him for twice already!

- One of the best math TA’s I have had year. Would have liked to have had solutions to at least some of the practice problems on the review sheet. Regardless, overall was a great TA.

- Your explanation is very simple and easy to digest. That helps me a lot when it comes to learning abstract topics like linear algebra.
