1. UCLA Department of Mathematics:

1. How would you rate your TA as an effective teacher?

   - Excellent: 13 responses
   - Failing: 4 responses

   Average: 8.76
   Median: 9
   Standard Deviation: 0.44

2. How would you rate the availability and helpfulness of your TA outside of the classroom?

   - Excellent: 12 responses
   - Failing: 4 responses

   Average: 8.65
   Median: 9
   Standard Deviation: 0.61

3. What is your rating of this course independent of the effectiveness of the TA?

   - Excellent: 12 responses
   - Failing: 3 responses

   Average: 8.35
   Median: 9
   Standard Deviation: 1.37

2. Comments:

2.1) Please use the space provided for any comments you wish to make which are pertinent to the educational process. These may include all aspects of the course: teaching, examinations, grading, textbook, etc.

- Adam always comes to class prepared with great example problems. He maybe even teaches us better than the professor. He makes understanding abstract material much easier.
- Adam is a great TA who really looks out for the interests of the students. He is willing to help you if you are invested in learning the material and really helped me master the material for this course.
- Adam is very helpful and explains mathematical concepts very well. He is also quite funny when he talks about random stuff.
- Awesome TA. Always super available -- I was even able to make a personal appointment with him before the first midterm to go over questions I had because I couldn't make it to his scheduled office hours. He often explains topics with more clarity than the professor does. Makes sure to cover all angles and show us different methods of approaching the problems. Thanks Adam!
- Great TA. Always available and willing to help. Very knowledgeable and relatable.
- He is a godsend. If I pass, I owe it to this guy.
- I really appreciate how you took the time to give very detailed explanations to homework and quiz questions. It was also incredibly helpful to see the way you connected our current topics to other mathematical concepts that we had learned in the past in order to bring things into perspective. Thank you for taking the time to write up solutions for our second midterm and for occasionally sending out documents that detailed how to tackle some of the harder problems we had to deal with. All of these things combined made for a very informative discussion section and an effective use of your office hours.
- This TA made the material a lot more clear than the professor. He was very helpful during office hours and was well prepared for discussions. He had a very good grasp on the material and conveyed information well.
- Very clear and helpful
